COLIN PONS

SYSTEMS ARCHITECT | MASTER DATA PURIST | INTJ

ABOUT

I am a dedicated professional with a passion for utilising product master data to drive value for organisations. I strongly believe in the power of scalable, simple, and accurate product data. Having transitioned from retail management to an office-based role, I have developed robust self-management skills and a proficiency in Python.

I am also self-trained in LEAN process management, with a proven ability to streamline processes and eliminate waste. I possess excellent stress management skills and am proficient in Excel including capitalising on advanced features to articulate data stories. I thrive on solving complex data-related challenges and have a keen ability to analyse data flow within an organisation to identify and resolve root cause issues.

I excel in listening and information gathering, which facilitates my effective communication with process owners and key stakeholders. I am comfortable asking probing questions to ensure a comprehensive understanding of processes and terminology, enabling me to communicate effectively within the wider data community.

RECENT EXPERIENCE

SYSTEMS ARCHITECT

Evo Group — Feb 2023 to Present
Research, develop and conceptualise modern technologies to expand, elevate and improve existing product data, business processes and task optimisation. Delivery of "vendor portal" project which includes single point of entry of product data from external sources, automated rich html formatted content and expanded product specifications from connected content aggregators.

PIM SYSTEMS ANALYST

Evo Group — Jun 2021 to Feb 2023
Explore, develop, and deliver PIM system solutions via workflows, rules, and business logic. Key project member in delivering automation solution of product data delivery to ERP systems. Pushing PIM functionality to exceed business requirements as well as ensuring input and output is as end-user functional as possible. Delivery of data centralisation project including 10.2mil data points cleaned and 32 new automation workflows designed and created.

LOCAL DATA SPECIALIST

Evo Group & Staples UK – Jan 2018 to Jun 2021
Maximise the scalability and quality of vendor and article master data at local business unit level by capitalising on critical and creative thinking. Key liaison between global support centres and local operating business. Including, but not limited to, master data requests and queries.
